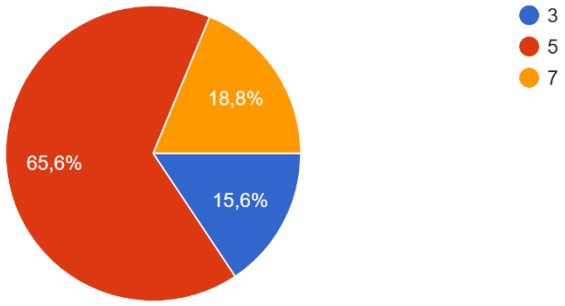
STUDENT WORKLOAD
BACHELOR OF COMMUNICATION SCIENCE

COMMUNICATION SCIENCE PROGRAM STUDY
FACULTY OF SOCIAL DAN CULTURAL SCIENCES
UNIVERSITAS TRUNOJOYO MADURA
2023

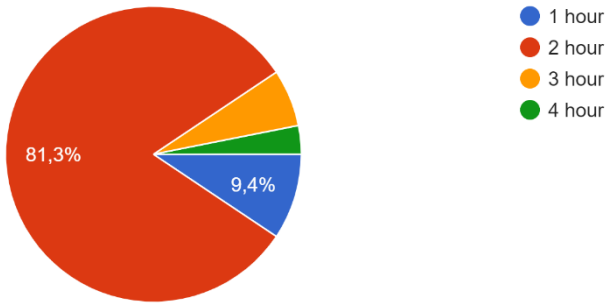
Population
Students from semester 3, 5, and 7



This survey was conducted by the Quality Assurance Team to measure the continuity of learning with student workload. The research sample was some 3rd semester students (18.8%), the majority of 5th semester students (65.6%) and some 7th semester students (15.6%). The sample was chosen randomly with the semester composition following the curriculum workload, which was mostly in semester 5.

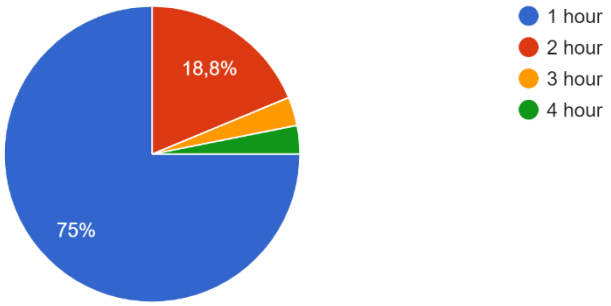
The Average Length (In Hour) In Each Week

1. **The average lenght (in hour) of the lecture in each meeting**



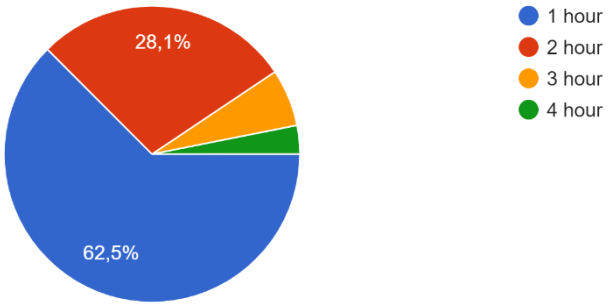
From this data, students on average face to face with each lecturer 2 hour course (81.3%). In certain cases students follow 1 hour face-to-face lecture because it uses practice-based concepts. And more than 2 hours for field courses.

2. **The average lenght (in hour) of practice during the course**



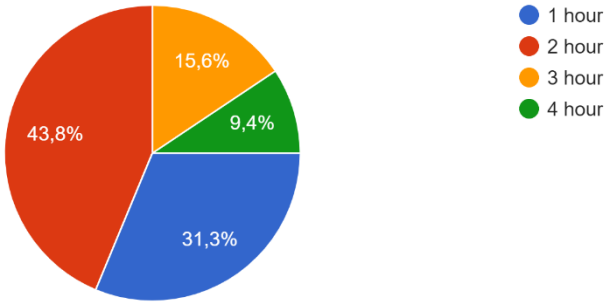
This data shows that students take part in practicum with lecturers in the capacity of listening to work instructions and others for 1 hour (75%) then for certain more complex technical matters for 2 hours (18.8%) or more. The remaining students will study independently to deepen and adapt.

3. **The average lenght (in hour) of independence study of the course**



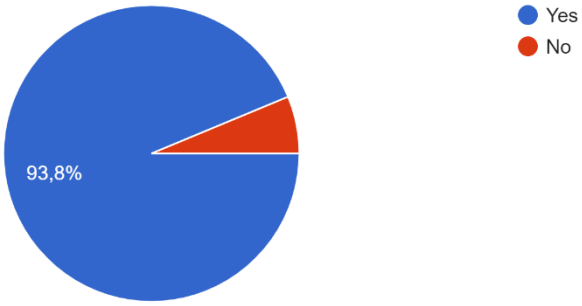
This data shows that on average students study independently for 1 hour outside of face-to-face and classroom practicum (62.5%). For 2 hours for certain cases such as material adjustments and problem solving (28.1%). This means that students still have several opportunities to explore other activities that support graduate capacity.

4. **The average lenght (in hour) of finishing the assignment in each meeting**



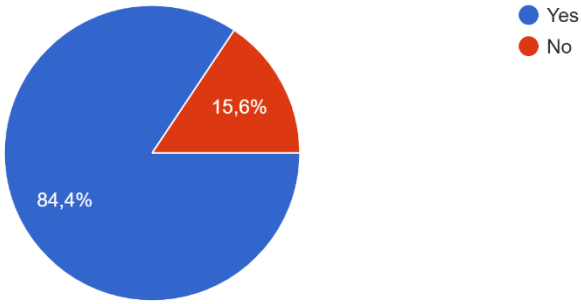
In assignments, the majority of students spend a minimum of 2 hours completing assignments (43.8%). The remaining students could complete it in 1 hour (31.3%). The longest is 4 hours only for certain cases (9.4%).

5. **With the work (study) load above, do you have enough time to do scheduled intra-campus activity?**



From this data, students have opportunities for activities outside of lectures (93.8%). This activity can take the form of participating in a student activity unit. Participate in research activities with lecturers outside of lectures. As well as other self-development in the campus environment.

6. **With the work (study) load above, do you have enough time to do extra-campus activity?**



The majority of students can still take part in off-campus activities such as external organizations (84.4%), religious or community activities. This opportunity increases student networking and strengthens social capital to strengthen the capacity of graduates.
